

FLUORESCENT FLOWER

Opoczno presents a new collection in 30x60 format. Fluorescent Flower is a unique collection with characteristic decorations on glass. Original floral motifs, drawn with fluorescent, multi-color line coming out of a black background. It is an innovative proposal among the currently fashionable glass decorations. The Fluorescent Flower collection also includes a unique border with actual fluorescent properties – Fluorescent yellow border glass 2x60. Due to the use of the latest technological solutions, the border glows in the dark with lime-green and white light.

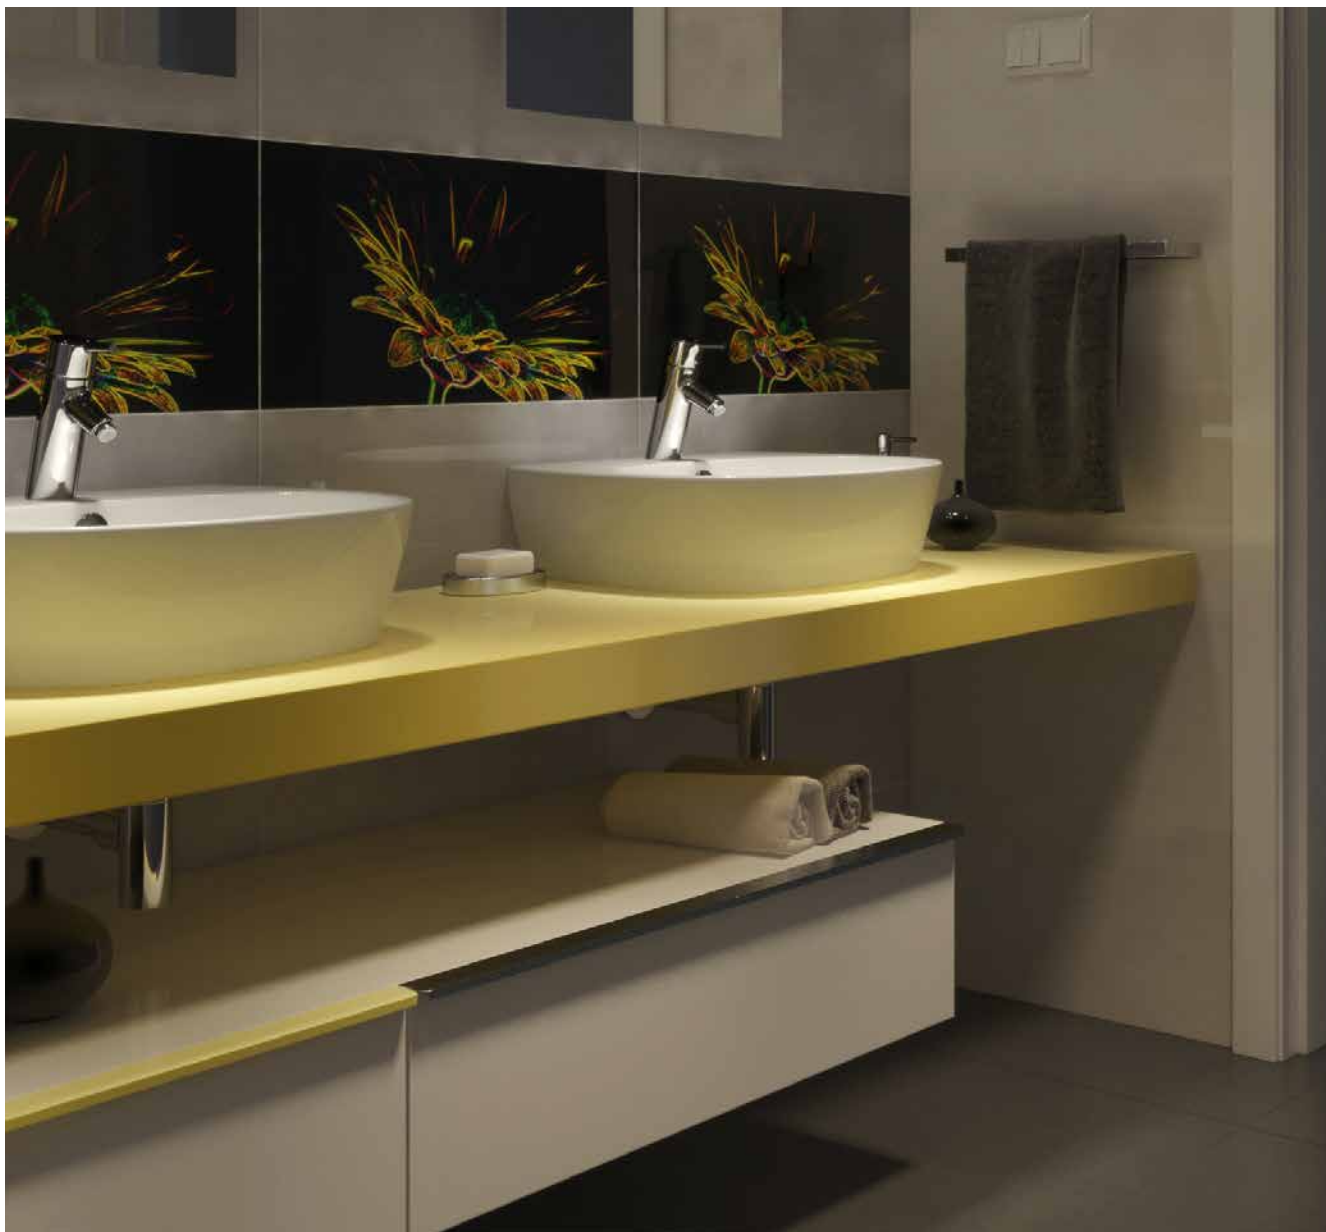

Despite intensive, definite colors, the versatile coloring of the insertos allows to combine them with single-color glossy tiles, as well as with satin-finish ones. Such combinations make up for interesting texture contrasts. Another very interesting solution for interior design is the combination of the decorations from the Fluorescent Flower collection with stone-texture tiles and multi-color glass borders from the offer of Opoczno.

The collection has a definitely modern character. It is dedicated to those who like novelties and look for out-of-the-box solutions, and for those who want to give their interior an individual character.
